

=HIGH SEAT=

A height from the ground 850mm : 20mm higher than the original XSR900 seat.

- * An even and flat sitting surface gives riders a great flexibility back and forth while riding.
- * You can enjoy more relaxing ride because of the wider surface.
- * Eliminate uncomfortable corner touched inner legs when you are sitting on the XSR900 original seat.
You can put your legs down straight to the ground smoothly.
- * Enable easy footstep operation from the higher position. Feel yourself comfortable as your knees bend less tight.
- * Your weight applies more on footsteps, decreasing a load and pain on your buttocks.
- * Use high quality injection sponge developed originally; great elasticity and won't deteriorate over time.
- * A good thickness sponge provides you a comfortable ride, highly recommend especially for long touring.
- * We create all product from a seat base. No unsightly gap between tank cover and frame.
- * Our seat installation is done by key, same as the original. None of troublesome work is needed.
- * Detachable tandem belt is attached as a standard equipment.
Need a hook relocation from the original XSR900 seat.

=SINGLE SEAT=

A height from the ground 840mm : 10mm higher than the original XSR900 seat.

- * An even and flat sitting surface gives riders a great flexibility back and forth while riding.
- * You can enjoy more relaxing ride because of the wider surface.
- * Eliminate uncomfortable corner touched inner legs when you are sitting on the XSR900 original seat, so even though it gets higher, you can get the better reach to the ground.
- * Enable easy footstep operation from the higher position. Feel yourself comfortable as your knees bend less tight.
- * Your weight applies more on footsteps, decreasing a load and pain on your buttocks.
- * Use high quality injection sponge developed originally; great elasticity and won't deteriorate over time.
- * A good thickness sponge provides you a comfortable ride, highly recommend especially for long touring.
- * We create all product from a seat base. No unsightly gap between tank cover and frame.
- * Our seat installment is done by key, same as the original. None of troublesome work is needed.
